Subject: Forest Lake DASH Service 2024

Hello Mr. Raabe,

Thanks for reaching out to us again this year. After reviewing and discussing the work involved with servicing Forest Lake, last season with our crew members, we felt it necessary to make some changes going forward. Due to the fact that Forest Lake is a non-motorized lake and has very limited access we were not able to bring in our normal removal equipment. While we did have some success with our raft last season, our efficiency suffered greatly while working on the lake. Therefore, this year we will not be able to split our one-day service and cost between multiple riparian's/neighbors. Also, we will need to leave the harvested weeds on the site for customer disposal. We can remove the harvested weeds at an additional cost if needed. Due to the density of the weeds on Forrest Lake and having to manually move the raft around as we work, we will not be able to guarantee the daily square foot removal coverage area. Our current one-day service is \$2250, this includes 6 hours of harvesting with 2-4 labors, based on an 8-hour workday. Service also depends on us having access to the lake.
